DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:
Group I, claims 37, 38, 40, 41, 43-46, 50 and 52-55, is directed to a distinct species of spatial light modulator wherein individual actuators move respective ones of the mirrors with respect to the surface of the substrate; Group II, claims 56-67, is directed to a distinct species of spatial light modulator wherein through use of the plurality of coupling devices, movement of one of the respective adjacent ones of the plurality of individual actuators affects movement of other ones of the respective adjacent ones of the plurality of individual actuators.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

During a telephone conversation with Jason D. Eisenberg on 01/16/08 a provisional election was made without traverse to prosecute the invention of Group I, claims 37, 38, 40, 41, 43-46, 50 and 52-55. Affirmation of this election must be made by applicant in replying to this Office action. Claims 56-67 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jason D. Eisenberg on 01/16/08. The application has been amended as follows:

In the claims:

Claims 56-67. (cancelled).

REASONS FOR ALLOWANCE

Claims 37, 38, 40, 41, 43-46, 50 and 52-55 are allowed. The following is a statement of the examiner's reasons for allowance. Regarding claims 37, 54 and 55, the prior art fails to disclose that the incident wavefront is received by the mirrors normal to the substrate and is modulated across the two dimensional array of mirrors to produce an output wavefront having at least one of a phase shift or an interference pattern in the output wavefront. The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
